DETAILED ACTION

1. Original claims 1-15 are presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 13-15, drawn to output responsive power supply regulation, classified in class 323, subclass 265.
 - II. Claims 6-12, drawn to overvoltage protection of electrical devices, classified in class 361, subclass 43.

The inventions are distinct, each from the other because of the following reasons:

Invention Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Group I has separate utility such as active feedback circuitry for droop regulation and current sharing of voltage regulators, Group II has separate utility such as synchronization of multiple voltage regulators to cope with overload of a single voltage regulator. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2115

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion
